

HI THERE!

MY NAME IS SIMON WAHLSTRÖM AND I'M A DEVELOPER

ABOUT ME

I've always had a profound interest for computers. When I was around 13 years old I stumbled upon an e-book about Batch programming. After writing my first "Hello World" I knew right away what I wanted to do when I grew up. Since then I've devoted myself to become a great developer and I've never doubted my career choice. I don't code because I have to. I do it because I love it.

EXPERIENCES

- 2020 Software Engineer**
Sappa (Västerås / Göteborg, 2020 - Current)
 I am currently working as a fullstack developer at Sappa. I am responsible for all of Sappas on premise Linux servers. My latest achievement was rebuilding the entire business engine together with a colleague. I've also spent many hours on improving Sappas internal customer service application.
- 2015 Software Engineer / Technical Consultant**
Voormedia (Enköping / Amsterdam, 2015 - 2020)
 After I finished my thesis Voormedia wanted me to join their team. Since I had already decided to move back to Sweden they offered me to open a new office for them here in Enköping, so I did. During my time at Voormedia, I've worked with several different programming languages but mainly Ruby on Rails, NodeJS and React. I'm was co-responsible for one of our biggest clients (Omron). This responsibility included planning of projects together with the customer, delegating work within the team and making sure that the customer always felt happy working with us.
- 2014 Software Engineering Intern (Master thesis)**
Voormedia (Amsterdam, 2014 - 2015)
 The goal was to identify characteristics in JPEG images and use the characteristics to find the best possible compression rate for any given image.
- 2012 Emfio (Bachelor thesis)**
Police it-forensics department (Stockholm, 2012 - 2012)
 Emfio – Uniform templates for IT-forensic operations. The thesis was carried out together with the police it-forensics department.
- 2008 Clerk**
Ica Maxi (Enköping, 2008 - 2015)
 I worked mainly as a cashier and in their internal post office. I also presented new products and helped with shelf-stocking. Due to extensive work I have managed to complete my studies without taking student loans.

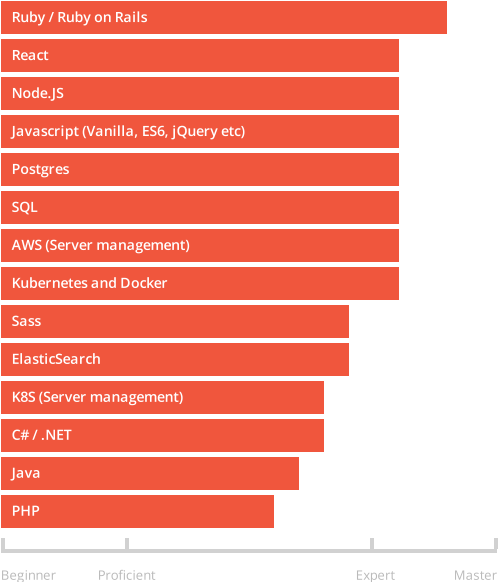

EDUCATION

- Master's degree (European)**
 2014 - 2015
Vrije Universiteit Amsterdam
 Master in computer science and software engineering. (Global software engineering European master). Spent my last year of my master's degree in Amsterdam. Finishing the GSEEM program earned me both a Swedish and international degree in computer science.
- Master's degree (Swedish)**
 2013 - 2015
Mälardalen University
 Master in computer science and software engineering. (Global software engineering european master). Started pursuing my master's degree in Sweden. I chose to join the GSEEM program (gseem.eu) for a opportunity to study one year abroad.
- Bachelor's degree (Swedish)**
 2009 - 2012
Mälardalen University
 Bachelor in computer science and software engineering.
